Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Detailed Action

Response to Amendment

1. Applicant's amendment and accompanying Remarks filed on 6-6-2002 have been entered and carefully considered.

The amendment is insufficient to overcome the anticipation and obviousness rejections of claims 1-10 and the 112 2nd paragraph rejections of claims 3-7 and 9. The anticipation and obviousness rejections of claims 1-10 are withdrawn because the reference used, US 5,651,641 to Stephens et al fails to clearly disclose applicant's structure. Specifically, applicant's limitations are not clearly anticipated or rendered obvious because a three dimensional mesh structure as a matrix does not clearly describe as structure that can anticipate or obviate applicant's claims. Applicant has failed to amend the claims to overcome the 112 2nd rejections. The amendment is sufficient to overcome the 112 1st paragraph rejection of claim 1 and the 112 2nd paragraph rejections of claim 2, 8 and 10. Applicant's arguments are rendered moot in view of the new grounds of rejection.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

3. Claim 1 is rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make

Art Unit: 1771

and/or use the invention. With regards to said claim, phrase "extruded in same phase" is drawn to the fabrication of a three dimensional article via the extrusion process.

Applicant has not disclosed how to extrude in three dimensions. Nor has applicant shown that such a process is well known in the art.

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

5. Claims 1-10 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

6. Regarding claim 1, applicant does not clearly describe what is meant the following phrase: "a first and second layer which are placed next to one another and joined by spacers which are extruded in a single phase together with said layers, at least one of said layers constituted by at least one set of yarns arranged at one end of said spacers, said spacers having a shape, cross section and height that vary according to required compression resistance of said spacers". How are layers placed next to each other yet separated by spacers? Examiner assumes Applicant meant for layers to be next to each other in the sense that they are on top of one another and separated by spacers.

7. 35 U.S.C. 112, second paragraph rejections of claims 3-7 and 9 are maintained as per sections 8 and 9 of the last office action.

Conclusion

Art Unit: 1771

8. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office Action. Accordingly, THIS ACTION IS MADE FINAL. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
